

The MimioProjector™ interactive projector can be mounted vertically* so that you can display and interact with Mimio content on a tabletop or other horizontal surface. Working on a tabletop is often easier and tends to feel more natural, particularly for younger students. It also tends to enhance hand-eye coordination, compared to working on a vertical surface.

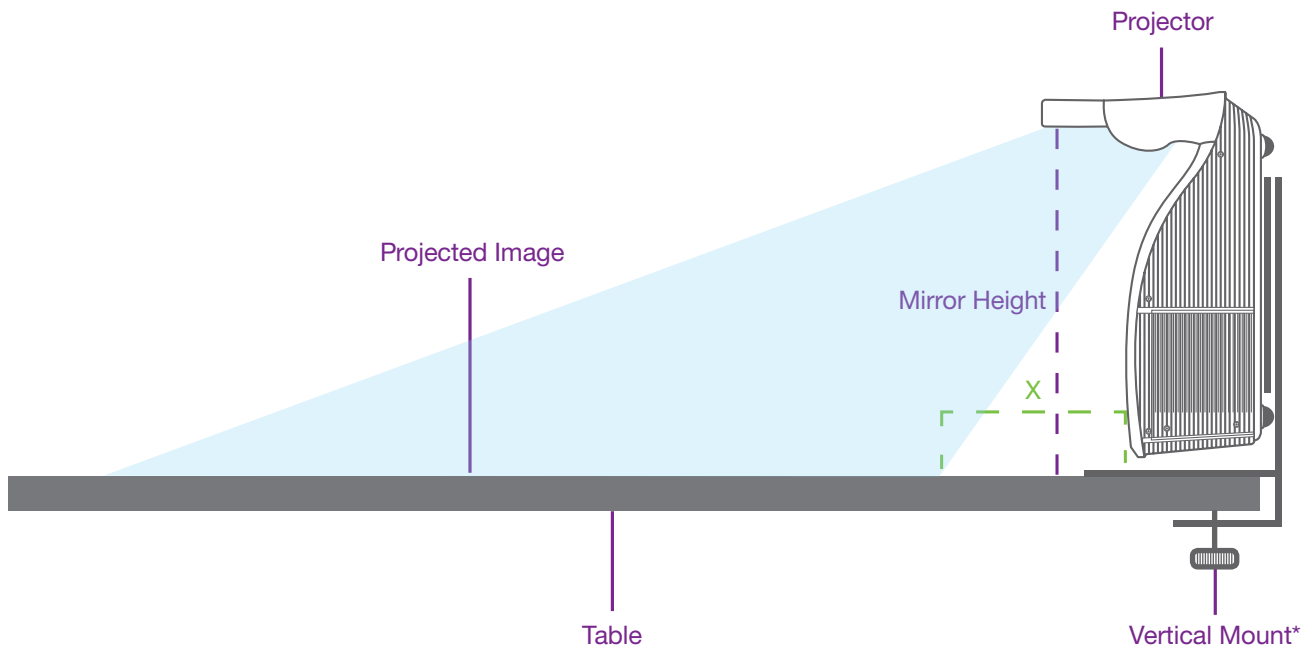

INSTALLATION

The MimioProjector device should be securely mounted to the surface.

ASPECT RATIO	MINIMUM DIAGONAL SIZE	DISTANCE X
4:3	43.5 in. (1104.9 mm)	3.5 in. (88.9 mm)
16:9	48 in. (1219.2 mm)	4.75 in. (120.65 mm)
16:10	49.5 in. (1257.3 mm)	3.5 in. (88.9 mm)

Notes:

- Minimum mirror distance from tabletop: 13.5 in. (342.9 mm)
- Distance X figures above assume that the projector's mirror sits 13.5 in. (342.9 mm) above the table surface.
- Distance X figures will increase as the projector is raised farther from the surface.

* Vertical mounts are available from third parties.
